

New York State Weatherization Directors' Association

A Partner with the New York State Community Action Association and
The Association for Energy Affordability

April 8th, 2010

Mr. Jim Bodensteiner
Wyoming County Community Action, Inc.
6470 Rt. 20A Suite #1
Perry, NY 14530

Dear Jim,

Enclosed please find your OSHA 10- hour Construction Training Course. I am sure you did not need this training, but I appreciate you sitting through it nonetheless. Your Agency sets the gold standard for a safety-minded weatherization agency. If we ever get the chance to set up a safety task force or sub-committee, you will be at the top of my list.

We have tried to tailor this course for your weatherization work. As we stated, there are many areas that we may have not covered in the training. While the training emphasized many construction activities, it did not cover many others. If your future endeavors take you to such areas, you should be mindful that you may require additional safety training to work in these areas and to be aware of safe operating procedures, as well as safe work practices.

It was a pleasure offering you the training. Your Agency already has an excellent safety program in place, and you should be aware of that. Your agency goes above and beyond what many others in the State do for their workers and their safety. Wyoming County is definitely on that positive part of the curve when it comes to safety. Congratulations to you all! If your Agency didn't value safety, you probably would not have been sent to this training in the first place. Knowledge of safe workmanship is a very powerful tool for your use.

My best wishes as you move forward with your work, and in doing so in a safe manner.

Bill Manning
